

MANAGEMENT DECLARATION

Our customers expect us to deliver an affordable quality product within the agreed timeframe. In order to control all parameters, it is essential for Steen Parts & Prototyping to have a standardized quality management system.

Steen Parts & Prototyping is a growing company specialized in : "industrial supply of sheet metal works, CNC milling and turning of metals and plastics" within various industrial supply domains.

The Steen Parts & Prototyping team is composed of expert experienced people in combination with young and ambitious team members.

We advise you on strength, accuracy and cost of the requested piece. Thanks to our extensive machinery we are able to finish both small and large series in a **qualitative, competitive** and **flexible** way.

A priority investment is to build a quality management system. That is why every employee, is cultivated a quality awareness. In addition, investments are made in people and equipment, which enables us to supply quality products that also meet the strictest requirements and standards.

We emphasize the following points:

- we are committed to complying with all legislative and regulatory requirements demanded by our stakeholders,
- we take action on the known risks and opportunities,
- we want to work on continuous improvement every day,
- every order is produced and delivered with the necessary attention,
- quality work gives satisfaction to ourselves, it creates pride in our own work and it strengthens our internal cooperation,
- we work according to the rules of the quality manual, its provisions must be applied effectively, this is tested through internal and external audits,
- quality products and service are a prerequisite for further success.
